

EDUCATIONAL

UAB - Heritage Hall Birmingham, AL

Heritage Hall from University Boulevard

UAB's Heritage Hall is a new 95,000-square-foot academic building that opened for classes 21 months after notice to proceed. Located on the northwest corner of the Campus Green on University Boulevard at 14th Street, it will house the School of Social & Behavioral Sciences programs, plus labs for mathematics and communication studies and faculty offices.

The new building provides classrooms, lecture halls, instructional labs, and faculty offices in quantities and sizes appropriate to the instructional needs of the Core Curriculum and the graduate and undergraduate programs in the academic disciplines. The instructional spaces have digital multi-media technology and provide special purpose centers to support interdisciplinary activities, tutoring, and administration. KPS Group, Inc. lead by principal Hugh Thornton, Jr., and vice president Susan Lineberry, with Goody Clancy & Associates as associate architects.

CRS provided complete engineering services including mechanical, electrical, plumbing, fire protection engineering as well as security and network design services. This "Smart Building" incorporated a mechanical energy recovery unit, power and lighting control systems, a wireless data network, day lighting controls and other advanced energy efficient technologies.
