

Pearl City Food Port (SEZ)

Indian Special Economic Zone

With extensive international food engineering experience, SSOE was chosen to design a master plan greenfield project spanning more than 300 acres in Tuticorin, India. This includes a wide range of facilities encompassing cold storage, warehousing, irradiation complex, food testing laboratory, and logistics planning, as well as a wide variety of food processing plants including grains, oils, and vegetables.

SSOE's conceptual plans of the facilities is complete for this comprehensive development. The site, located near the Tuticorin seaport, airport, rail, and road networks, has an outreach to the rest of the world.

When construction complete, the site will contain over 20 food manufacturing plants, a housing development, a retail complex, a hospital, a school, and an 18-hole golf course.

value promise

Tuticorin, India receives a first-of-its-kind food processing SEZ with an integrated township combining commerce and convenience.
