

ambulatory care

⌘ ssoe®. making clients successful.

Why SSOE? The SSOE Experience is the combination of our Value Promise and Great Client Service that results in trusted relationships.

To consistently exceed clients' expectations is a common goal in our industry. So, how is our promise of outstanding performance any different from others? We have proof. More than 98% of clients we surveyed would recommend SSOE Group to a colleague. And more than 150 of our clients have been with us for at least 20 years. These endorsements are a result of our Great Client Service—our corporate-wide commitment to understand and exceed your expectations and deliver unexpected benefits.

For decades, we've found ways to deliver greater value to clients. You can count on us to deliver high quality projects, on schedule, with fewer problems, and for lower total cost to save you time, trouble, and money. Through this Value Promise SSOE returned 105% of our fee to clients in the form of project savings over the last 5 years.

Advantages of our Ambulatory Care Services

- SSOE's team of healthcare experts understands the specialized, functional requirements of ambulatory care facilities and creates cost-effective solutions to meet them.
 - Our approach considers all stakeholders as well as users. We assure the space is easily accessible and comfortable for patients and that the project as a whole supports the hospital system's business goals.
 - As changes in technology and reimbursement patterns affect ambulatory care facilities, we develop new options to address their evolution.
-

“I can’t say enough about the level of dedication and responsiveness SSOE has demonstrated on our projects. They weren’t satisfied to simply do a good job. They wanted to do an impressive one and they have what it takes to do that. Because they were as invested in the outcome of the project as we were, they continually looked for ways to add value to the end product. Thanks to their recommendations and creative input we have better-designed, more cost-effective facilities than we anticipated.”

Jon O’Malley, Vice President
Mt. Clemens Regional Medical Center

Building Types

- Ambulatory care centers
- Ambulatory surgery centers
- Dialysis centers
- Oncology
- Diagnostic imaging
- Medical education facilities
- Medical offices
- Women’s centers
- Specialty practices
- Hospice
- Retail clinics

Technical Specialties

- 3D animation and renderings
- Building Information Modeling (BIM)
- Certificate of Need (CON) preparation assistance
- Data / Fire / Security
- Facility condition assessments
- Furniture and fixture selection
- Healthcare architecture
- Healthcare engineering
- Interior design
- Landscape architecture
- Medical planning
- Procurement
- Programming and space planning
- Project management
- Renovations
- Signage and wayfinding
- Specialties
- Strategic master facilities planning
- Sustainable and renewable solutions

SSOE Facts

- SSOE was founded in 1948 and currently has more than 20 locations worldwide.
- We are a project delivery firm for architecture, engineering, and construction management, with projects in 40 countries.
- SSOE offers program management services from design through construction, to commissioning and start-up, for seamless project delivery.
- SSOE's focus is using the appropriate project delivery method for your goals, including Virtual Design and Construction (VDC), which brings our clients better and faster results through more integrated teams and advanced technologies. Even when a more traditional delivery model is used, you'll see significant benefits from the collaboration strategies and technological capabilities our leadership in VDC necessitates.
