

data / fire / security

⌘ ssoe®. making clients successful.

Why SSOE? The SSOE Experience is the combination of our Value Promise and Great Client Service that results in trusted relationships.

To consistently exceed clients' expectations is a common goal in our industry. So, how is our promise of outstanding performance any different from others? We have proof. Greater than 98% of clients we surveyed would recommend SSOE Group to a colleague. And more than 150 of our clients have been with us for at least 20 years. These endorsements are a result of our Great Client Service—our corporate-wide commitment to understand and exceed your expectations and deliver unexpected benefits.

For decades, we've found ways to deliver greater value to clients. You can count on us to deliver high quality projects, on schedule, with fewer problems, and for lower total cost to save you time, trouble, and money. Through this Value Promise SSOE returned 105% of our fee to clients in the form of project savings over the last 5 years.

"During the 10 years I've been its client, SSOE Group has met my wide range of engineering needs including fire detection / prevention and mass notification. They perform in an ethical manner and strive for excellence in meeting project goals. The persons with whom I've worked are highly professional and are constantly looking for ways to improve their performance. They are readily available and very willing to meet even rigorous project schedules."

Jeffrey Pulter, Electrical and Instrumentation Coordinator
Marathon Oil Company – Detroit Refinery

Advantages of Data / Fire / Security (DFS) Services

- Our certified NICET® and RCDD designers are experienced and keep updated on all aspects of security, communications, fire alarm, and low voltage systems.
- We perform all data, fire alarm, and security design and integration services in-house. This approach facilitates improved coordination between engineering disciplines.
- Because we are independent of any equipment supplier, we recommend the best equipment for your needs without vendor bias.
- We specify sustainable and recyclable products whenever possible, as well as low power-consuming equipment that can reduce both harmful emissions and overall energy costs.
- Our experience with a wide range of systems and advanced technology, allows us to integrate multiple systems for seamless functionality. For example: We integrate fire alarm systems with video surveillance and access control systems to provide a single point of notification and control. Also, we integrate fire alarm systems with production equipment. This enables the command center to shut down equipment in a specific area when an alarm is detected to prevent loss or damage.

Project Types

- Access control and security
- Asset tracking
- Budget estimating
- Building automation
- Cabling management and distribution
- Command and control facilities
- Data centers / Server rooms
- DFS audits
- Emergency communications
- Environmental monitoring
- Fire alarm and control systems
- High-end lighting and energy control
- LEED® certification
- Mass notification
- Muster and accountability systems
- Operational control rooms
- Paging
- Sound, audio, multimedia, and videoconferencing systems
- Time, attendance, and productivity tracking
- Video surveillance and CATV
- Voice, data, LAN, and WAN
- Wireless data and telephone

SSOE Facts

- SSOE was founded in 1948 and currently has more than 20 locations worldwide.
- We are a global project delivery firm for architecture, engineering, and construction management, with projects in 40 countries.
- SSOE offers program management services from design through construction, to commissioning and start-up, for seamless project delivery.
- SSOE's focus is using the appropriate project delivery method for your goals, including Virtual Design and Construction (VDC), which brings our clients better and faster results through more integrated teams and advanced technologies. Even when a more traditional delivery model is used, you'll see significant benefits from the collaboration strategies and technological capabilities our leadership in VDC necessitates.
