

# Corporate Workplace

Enhancing the brand and culture of your business by creating spaces that inspire success.

## IN-HOUSE EXPERTS

*Our full-service design team consists of architects, engineers, and specialty disciplines ready to focus on the details so you don't have to.*

Our multidisciplinary professionals provide creative design solutions from the inside out, specializing in beautiful spaces that reflect your corporate identity, serve the needs of your business, and enrich the lives of those who use them. Our recent addition of Stevens & Wilkinson, an award-winning architectural firm, significantly bolsters our portfolio. From single-story office retrofits to stand-alone headquarters or multi-acre corporate campuses, our inspired designs integrate flexibility, aesthetics, and occupant accommodations. Our style adapts to your needs and the environment, and we've designed everything from modern office spaces to historic renovations.

Our process starts with listening, but it doesn't stop there. We bring together your stakeholders and ask questions to discover information you may not have thought to share. This ensures we not only address your functional needs, but also your future plans and the feeling you want your space to evoke. The results are innovative environments that are welcoming, comfortable, and scalable—serving to attract, retain, and engage staff and clients.

### NEARLY 50 DESIGN AWARDS

We've been awarded nearly 50 design awards in the last five years

### 92% OF CLIENTS RECOMMEND US
