

HIGHER EDUCATION

FACILITIES THAT ENCOURAGE LEARNING, COLLABORATION, AND INNOVATION WHILE ADDRESSING THE NEEDS OF EDUCATORS, STUDENTS, AND RESEARCHERS

PROJECT TYPES

- Campus master planning
- Programming
- Site evaluation and design
- Academic and classrooms
- Laboratory facilities
- Libraries
- Athletic facilities
- Administration facilities
- Dining facilities
- Student housing
- Sustainable design
- Campus utilities upgrades

For decades we've designed educational facilities that encourage learning in schools and universities across the U.S. Your experience with SSOE will be truly full-service. We bring together all your architectural and engineering design requirements including security, A / V, and data, resulting in one point of contact and one point of responsibility. Using the latest 3D design programs and technologies, including virtual reality, ensures our clients understand the design intent and allows us to create technologically advanced, secure facilities.

Our experience spans facility retrofits, renovations, upgrades, and new construction to campus master planning. When you choose SSOE, rest assured that we'll engage you from the beginning, developing your project with your vision and expectations at the forefront. We understand the unique design mandates for state-of-the-art facilities and the challenges necessary to keep faculty and students engaged and attracted.

Our approach to the design of any facility begins by recognizing that every space, whether it is a classroom, laboratory, cafeteria, common area, or corridor, can become an extension of the learning environment. We work with our clients to design flexible and dynamic learning spaces, enhanced by technology and teaching methods that are student-centric and extend beyond classrooms. SSOE is committed to sustainable design principles; we believe we can use "green design" to inspire students while promoting healthier, functional, and affordable solutions for every project.

\$39M
COST SAVINGS

More than \$39 million
in documented savings to
Education clients since 2009

“At every opportunity, the SSOE team was available for questions and eager to meet with our administration, staff, and end-users—keeping everyone involved in the decision making and design process. During the construction phase, SSOE team members were true advocates for the college; they were on-site on a regular basis, and worked closely with contractors and administration to assure a successful project.”

– Michael S. McDonald, Executive Director – Operations, Owens Community College
