

## ***“For Safety’s Sake - Do Something”***

# **Are You Committed to Safety?**

### **Are you a gambler? Are you willing to risk it all?**

What happens when we “knowingly” commit an unsafe act or risky behavior? Ask yourself - Who loses the most? Who is affected by YOUR actions?

No matter if the risky behavior is on the job, at home or even on vacation, the consequences can be the same. The personal injury, financial burden, business impact, tarnished image and even death are all a reality when we are unsafe. With all this in mind, people need to make a decision that can lower and hopefully remove unsafe situations and bad behaviors.

The Weekly Safety Tips are one tool to help you learn about what can cause problems in your life. Sometimes they fit and sometimes they don’t but when they don’t, should you just ignore it? NO. We have an obligation to, not just protect ourselves but, protect others. Maybe it is a coworker, a friend, a stranger or even a family member.

For Safety’s Sake – Do Something to prevent a bad situation from occurring!

### **Make A Commitment.**

One way to impact your own personal safety is to make a commitment.

So what is commitment? It is defined in Webster as:

1. An agreement or pledge to do something in the future.
2. Something pledged.
3. The state or an instance of being obligated or emotionally impelled.

The true purpose is to help you understand the consequences and to strive to be safer at work, home, and play. Show your commitment to safety by printing, signing, and posting the certificate on the next page.

# *My Personal Commitment to Safety*

**As a personal commitment...**

**...I will make my safety and the safety of others a high priority to prevent any incident from occurring.**

**...I know we encourage a voluntary, self-reporting system to help identify unsafe situations and to eliminate them.**

**...I understand that discipline may be needed when acting in a reckless, careless, non-compliant, or defiant manner that exposes myself or others to potential injury.**

**...I shall be acknowledged and rewarded for my safe behaviors and actions to encourage others to be safe.**

**...I will assist in the investigation of incidents to determine a root cause and to not find fault but to help prevent a repeat situation in the future.**

**...I will design, engineer, manage, build, operate and maintain all work with the highest regard for a human life and the safety of others.**

**...that for Safety's Sake, I will DO SOMETHING to prevent a dangerous situation from occurring!**
